## RP2(Y) Pressure switches intrinsically safe

## All industrial environments

## Reduced overall dimensions

## Good vibration resistance

Resistant to short duration overpressure

Hazardous areas: 0,1, 2, 20, 21, 22
These pressure switches maintain a constant pressure around a chosen set value: regulator action. They trigger an alarm or safety system, when the pressure reaches a critical pre-set value.

## Important

Normal operation must be between $10 \%$ and $90 \%$ of the selected scale. The deadband values in the table overleaf are defined under these conditions.

All circuits must be equipped with a safety system protecting them against excess pressure.

Any pulsating circuit must be fitted with pulsation dampeners. Suitable separators must be used with incompatible process fluids.

## Technical Data $\left(20^{\circ} \mathrm{C}\right)$

| Fluids | All fluids compatible with the measuring element from $-40 \ldots . .150^{\circ} \mathrm{C}$ |
| :---: | :---: |
| Operating ambient temperature | From -30...70 ${ }^{\circ} \mathrm{C}$ |
| Storage temperature | From -40...70 ${ }^{\circ} \mathrm{C}$ |

## Cable identification, current rating

## Cable identification

## Current rating

Microswitch type SPDT

| M | Gold Contact <br> Fixed deadband | 10 mA min.; 50 mA max. <br> 28 Vdc max. |
| :--- | :--- | :--- |
| N | Tropicalized <br> Fixed deadband | 0.1 A min.; $0,12 \mathrm{~A}$ max. <br> 28 Vdc max.. |

## Operating principle

A flexible diaphragm actuates a microswitch by means of a piston. The set point is adjusted by means of a compressible spring installed in opposition.

## Regulation

Pressure of regulator type RP2(Y)
LCIE 03 ATEX 6160X
C $\boldsymbol{E}_{0081}$
《q> $\begin{aligned} & \mid M 1 \\ & \text { Exial }\end{aligned}$
(r) $\| 1 G$ and $D$

Ex ia IIC T6 or T5
Esp II 2 D Use without safety barrier certified for zone 21 or 22

| Dust IP6X | Gases |
| :---: | :---: |
| $\mathrm{T}^{\circ}$ surface | Class |
| $60^{\circ} \mathrm{C}$ | ambient $\mathrm{T}^{\circ}-30 \ldots 55^{\circ} \mathrm{C}(\mathrm{T} 6)$ |
| $75^{\circ} \mathrm{C}$ | ambient $\mathrm{T}^{\circ}-30 \ldots 70^{\circ} \mathrm{C}(\mathrm{T} 5)$ |

The installation must be in accordance to $U_{\text {max }}$ and $I_{\text {max }}$

All necessary measures must be taken by the user, to avoid the calorific transfer from the fluid to the apparatus head increasing the head's temperature to such that it reaches the self-ignition temperature of the gas in which it is used.

## Installation instructions

Hazardous area
Area $0,1,2,20,21,22$

## Non hazardous

area
$P \quad P=0,5 \mathrm{~W}$
$C_{a}>C_{i}+C_{\text {cable } ;} L_{a}>L_{i}+L_{\text {cable }}$
$C_{i}=$ Negligible ; $L_{i}=$ Negligible
Don't forget the barrier's resistors in the determination of Rc1.
In area 0 or 20, the loop calculation of the association pressure switches with safety barrier must be approved by notified organism.

## Dimensions (mm)

## Options

Oxygen application Code 0765
Stainless steel tag plate and wire Code 9941
Connection on pipe 2 " dia. Code 0407
Adjustment of the set point Code SETP
